Translate Algebraic Expressions

1) Product of 6 and q

2) 6 divided by s

3) Five-sixths of the sum of w and 2

4) 4 is subtracted from one-fifth of f

5) One-fourth of the sum of r and 5 plus the product of 6 and h

6) y is added to 2

7) One-sixth of the sum of r and 8 minus the product of 4 and y

8) 8 is subtracted from d

9) 9 is added to one-half of c

10) One-fifth of f is subtracted from 4

Translate Algebraic Expressions

1) Product of 6 and q

$$\underline{6q}$$

2) 6 divided by s

$$\underline{6/s}$$

3) Five-sixths of the sum of w and 2

$$\underline{\frac{5}{6}(w+2)}$$

4) 4 is subtracted from one-fifth of f

$$\underline{\frac{1}{5}f - 4}$$

5) One-fourth of the sum of r and 5 plus the product of 6 and h

$$\underline{\frac{1}{4}(r+5) + 6h}$$

6) y is added to 2

$$\underline{y+2}$$

7) One-sixth of the sum of r and 8 minus the product of 4 and y

$$\underline{\frac{1}{6}(r+8) - 4y}$$

8) 8 is subtracted from d

$$\underline{d-8}$$

9) 9 is added to one-half of c

$$\underline{9 + \frac{1}{2}c}$$

10) One-fifth of f is subtracted from 4

$$\underline{4 - \frac{1}{5}f}$$
